                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Dp
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   R:Favello, T.
submitted to the EMBL Data Library, June 1994
A:Description: The sequence of S. cerevisiae cosmid 9780.
A:Reference number: $46797
A:Accession: $46800

-I FUNCTION: CYTOCHROME C OXIDASE IS THE COMPONENT OF THE RESPIRATORY CHALVESS THE REDUCTION OF OXYGEN TO WATER. SUBUNITS 1-3 FORM THE FUNCTIONAL CORE OF THE ENZYME COMPLEX. CO I IS THE CATALYTIC SUBUNIT OF THE ENZYME. ELECTRONS ORIGINATING IN CYTOCHROME C ARE TRANSPERRED VIA THE COPPER A CENTER FORMED BY HEME AS AND HEME A OF SUBUNIT 1 TO THE BIMETALLIC CENTER FORMED BY HEME AS AND COPPER B (BY SIMILARITY).

-I- CATALYTIC ACTIVITY: 4 ferrocytochrome c + O(2) = 4 ferricytochrome

Eur. J. Blochem. 224.151-159(1994).
-!- FUNCTION: TERMINAL OXIDASE IS THE COMPONENT OF THE RESPIRATORY
CHAIN THAT CATALYZES THE REDUCTION OF OXYGEN TO WATER. SOXM
FORMS THE FUNCTIONAL CORE OF THE ENZYME COMPLEX.
-!- FUNCTION: CATALYTIC SUBUNIT OF THE ENZYME. ELECTRONS ORIGINATING
IN A QUINOL ARE TRANSFERRED TO THE BIMETALLIC CENTER OF SOXM
FORMED BY A HEME AND COPPER B.
-!- CATALYTIC ACTIVITY: 4 ferrocytochrome c + O(2) = 4 ferricytochrome
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               -!- SIMILARITY: IN THE C-TERMINAL SECTION; BELONGS TO THE CYTOCHROME C OXIDASE SUBUNIT 3 FAMILY.
